Excerpt from Illustrated Instructions for Setting Up and Running the Bickford Family Knitting Machine: Also for Making the Different Articles Thereon I present you this book to explain to you my position, and give you the confidence in my business and machine that every one should have before recommending a thing to their friends; and if you will look it through carefully, you will see what claim I have upon your confidence and patronage. In investigating the Knitting Machine business some over three years ago, I came to the conclusion that this branch of improvements had been left out entirely, and that it was my business to make a good labor-saving machine; and since that I have struggled through all manner of difficulties and disappointments, but have been determined all the while to succeed in presenting every household with one of the most useful and complete pieces of mechanism in the world; something that would enable the weary housewife to have a few hours of rest and recreation, as well as the matrons and young ladies of leisure and fashion to have a never failing fountain of pleasure as well as solid enjoyment. And feeling that no lady would object to spend her leisure moments in constructing something beautiful as well as useful, if she had a neat, handy article to do it on; and knowing that articles entirely improvised and completed by some dear friend are more highly prized than the most expensive articles made by others, I have kept pushing on until I have brought my machine to that perfection that the public demand before they are willing to spend their own money and recommend their friends to do so. Since I commenced some others have attempted, by infringing upon my improvements, to put something they call Knitters, into competition with me; but parties will not have to hesitate which to buy, for there is no attempt that will do one-fourth what mine will do. The Machine Knitting Tutor

Hand Knits by Machine is the one book that fully addresses the issues involved in adapting hand knit patterns and techniques to a knitting machine. Heavily illustrated with photographs and illustrations, the book puts as much emphasis on "why" as it does "how" and will guide both hand and machine knitters through the process. Part One contains individual chapters (Casting On, Increasing and Decreasing, Binding Off, Picking Up Stitches) that specifically focus on duplicating the hand knit methods on the machine - not the usual methods found in knitting machine manuals. There is an extensive chapter on machines, basic stitches and a chapter that illustrates, among other topics, beading techniques and garter bar usage. Part Two dedicates entire chapters to converting Mosaic stitches and lace designs to the machine; by hand selection or with punch cards and electronics. The Entrelac chapter features a unique method based on holding position, requiring no scrapping off. The chapter on Modular knitting covers basic "Domino" squares as well as some unique methods of joining diamond shapes. This is what some of the best hand knit designers and authors have to say about Hand Knits by Machine: "...A masterful, comprehensive, inspiring book. I love everything about it- the concepts, the illustrations, the organization." Sally Melville, author of The Knitting Experience "...this book a must for hand-knitters wanting to make the leap to the machine, as well as for machine knitters who want to add some great hand-knitting skills to their bag of tricks! Lace, entrelac and

mosaic patterning are fascinating when done on the machine, and Susan gives the technical back-up to ensure success." Deborah Newton, author of *Designing Knitwear*. "A great resource! This volume brings the sensibilities and handcrafted details loved by hand knitters to machine knitting." Norah Gaughan, author of *Knitting Nature*. "In *Hand Knits by Machine*, Susan Guagliumi guides the hand knitter through her many tips and tricks to make a machine knit sweater look completely handmade. Clear concise directions, explicit photographs and Susan's incredible expertise will turn you into a machine knitter in no time. Bobbles, lace, cables, mosaic and color-work patterns, entrelac and more are all hand knitting techniques that Susan gives instruction for working." Kristin Nicholas, author of *Knitting Today's Classics*. "The process of taking a hand-knit garment and recreating it with a knitting machine can be daunting at first, but with a little guidance, it can be very exciting! *Hand Knits by Machine* deconstructs each of the steps involved with clear and concise detail, making them understandable and achievable. As well, there are thorough explanations and instructions for techniques hand-knitters love, such as entrelac, mosaic knitting, and modular knitting, demystifying them so they can easily be accomplished with a knitting machine. This book is an excellent resource that will be referred to again and again." Trisha Malcolm, editor *Vogue Knitting Magazine*
